What Are We Building?

grafilab_whatareweb.png

Grafilab is uniquely positioned to address the growing demands of the AI market through its comprehensive suite of decentralized AI products:

- **Grafi Cloud:** By integrating centralized and decentralized GPU resources, Grafi Cloud ensures cost-effective and scalable computational power to support compute-intensive tasks, from AI training to gaming.

- **Grafi Co-Builder:** The Co-Builder platform fosters collaboration among developers, offering essential resources for AI apps/agents training, deployment, and project co-creation. This promotes innovation and accelerates the development cycle.

- **AI App Store:** Grafilab's AI App Store empowers developers by providing a seamless platform to deploy and monetize AI applications & agents. Users benefit from an extensive catalog of AI tools tailored to diverse industry needs.

- **AI Data Layer:** The Grafi AI Data Layer collects data from sources like CeDePIN Cloud, Inference API, and AI Apps/Agents within the Grafi ecosystem. It validates, labels, and organizes data into swarms, ensuring high-quality inputs for model fine-tuning. This refined data enhances Grafilab's customized MoE LLM and smaller LLMs, catering to diverse AI needs efficiently.
